

# PROJECT AND PRODUCTION MANAGER

**As Project and Production Manager at TriVision, you will be responsible for all operations, project management and execution activities. You will be fully responsible for projects and operations. You will optimize processes as TriVision grows, manage outsourced production and component business.**

The Project and Production Manager will work with the organisation to provide guidance to project managers, put out fires before they start, setup clear processes for project execution, product delivery and collaborate with sales to ensure seamless coordination, and ultimately contribute to the strategic development of the company's day-to-day operations as the company grows.

## **Your areas of responsibility**

- Manage the onboarding of new projects to ensure clients' expectations are met
- Manage active projects to identify and prevent risks, ensure effective implementation and timely delivery within project budgets
- Manage outsourced hardware production for products and projects
- Manage customer installation and commissioning phase and the sub-suppliers needed for this
- Implement processes to secure full delivery of projects/products, documentation and relevant approvals
- Manage, mentor and evaluate project managers
- Liaise with Finance to assess and improve project profitability
- Performance reviews and associated operational actions
- Work effectively with the CEO to optimize workflows in the full organisation to increase performance and efficiency

## **Professional competencies required**

- Strong project management skills including experience with managing automation project deliveries and sub-suppliers effectively
- Proven results in implementing efficient processes and resource management in a project organisation
- Experience with managing long-term client and customer relationships

- Excellent English communication skills, both verbal and written
- Relevant job experience from mechanical or automation industries.

**Personal profile**

- Ambitious and desire to lead the way
- Experience in a managerial role preferred – but more importantly you have the potential to lead others.
- Good at problem solving and ability to manage stress with a positive attitude, even in challenging situations
- Detail-oriented but still able to see the big picture
- Diplomatic but able to provide direct feedback and set deadlines
- Can-do attitude

**Educational background**

Master of Science in mechanical, electrical or production engineering

**Line of reporting.**

The position is reporting to the CEO/Managing Director of TriVision A/S

**Workplace.**

You will be based in Odense.

**Application.**
