

## PROJECT EXECUTION ENGINEER

**Do you master project execution, and do you have the abilities to work at the forefront of technological development?**

**TriVision is hiring a Project Execution Engineer to help us deliver leading machine vision inspection solutions and ensure the quality of food products around the globe.**

As Project Execution Engineer at TriVision, you will be responsible for project management and execution activities. You will be fully responsible for projects and delivery of Vision based quality inspection systems.

Your primary focus will be project execution and application development/customization. As a Project Execution Engineer, you will be involved in the project from start to finish, including software and system design in the beginning and running-in at the end of the project.

### **Your areas of responsibility**

- Manage the onboarding of new projects
- Strong project management skills including experience with managing automation project deliveries and sub-suppliers effectively
- Always focus on delivering according to URS and on time,
- Manage active projects to identify and prevent risks, ensure effective implementation and timely delivery within project budgets
- Conduct programming, technical setup, troubleshooting and testing during installation to ensure that our products function optimally in in our customers' existing systems and production lines
- Manage, monitor and track technical issues, risks and/or tasks during installation to ensure that all solution requirements are met before handover
- Manage customer installation and commissioning phase and the sub-suppliers needed for this
- Approach every task in a structured manner to ensure task completion and to deliver relevant knowledge-sharing, e.g. through installation reports and documentation
- Securing that the electrical documentation is up to date
